DETAILED ACTION

Introduction

1. The examiner acknowledges the applicants' submission of the amendment dated 9/6/2007. At this point, claims 1-2, and 11-26 have been canceled. Thus, claims 3-10, are pending in the instant application.

Allowable Subject Matter

2. Claims 3-10 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 3-4, the prior art alone or in combination does not teach the limitation of a capacitor equipped substrate assembly comprising a substrate and a capacitor, wherein the thermal expansion coefficient of the capacitor main body is smaller than that of the substrate.

With respect to claims 5-7, the prior art alone or in combination does not teach the limitation of an interposer comprising an interposer main body having a first surface on which a semiconductor device having surface-connecting terminals is mounted and a second surface formed with a recess, and a plurality of interposer main body side electrically conductive vias penetrating the interposer main body between the first surface and a bottom surface of the recess and connected to the surface-connecting terminals.

With respect to claim 8, the prior art alone or in combination does not teach the limitation of a semiconductor device equipped interposer assembly comprising: an interposer main body having a first surface on which the semiconductor device having

Art Unit: 2831

surface-connecting terminals is mounted and a second surface formed with a recess, and capacitor disposed in the recess and having front and rear surfaces and a plurality of capacitor side electrically conductive vias extending through the front and rear surfaces.

With respect to claim 9, the prior art alone or in combination does not teach the limitation of an interposer equipped substrate assembly comprising an interposer having a plurality of interposer main body side electrically conductive vias penetrating the interposer main body between first and second surfaces and connected to the surface-connecting terminal and a capacitor disposed in the recess.

With respect to claim 10, the prior art alone or in combination does not teach the limitation of an assembly comprising an interposer having an approximately plate shaped interposer main body having a first surface on which the semiconductor device is mounted and a second surface formed with a recess, and the interposer further having a plurality of interposer main body side electrically conductive vias penetrating the interposer main body between the first surface and a bottom surface of the recess and connected to the surface-connecting terminals and a capacitor disposed in the recess.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation Relevant of Prior Art

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Naito et al. (US 6,606,237) disclose multilayer capacitor, wiring board, decoupling circuit, and high frequency circuit incorporating the same.
- b. Ogawa et al. (US 6,577,490) disclose wiring board.
- c. Mori et al. (US 6,391,422) disclose wiring substrate and stiffener therefor.
- d. Kuroda et al. (US 6,351,369) disclose multi-layer capacitor, wiring substrate.
- e. Nagakari et al. (US 6,282,079) disclose capacitor having low impedance in a wide frequency region.
